

MEAD Education S.A.

Low-Power Analog IC Design

**EPFL, LAUSANNE, SWITZERLAND
JUNE 30 - JULY 4, 2014**

MONDAY, June 30

8:30 - 12:00 am	MOS Transistor Modeling for Low-Voltage and Low-Power Circuit Design	Christian Enz
1:30 - 3:00 pm	Basic Low-Power, Low-Voltage Circuit Techniques	Willy Sansen
3:30 - 5:00 pm	Differential Amplifying Blocks with Positive Feedback	Willy Sansen

TUESDAY, July 1

8:30 - 10:00 am	Noise Performance of Elementary Transistor Stages	Willy Sansen
10:30 - 12:00 am	Stability of Operational Amplifiers	Willy Sansen
1:30 - 3:00 pm	Systematic Design of Low-Power Operational Amplifiers	Willy Sansen
3:30 - 5:00 pm	Important Opamp Configurations	Willy Sansen

WEDNESDAY, July 2

8:30 - 10:00 am	Fully-Differential Operational Amplifiers	Willy Sansen
10:30 - 12:00 am	Bandgap and Current Reference Circuits	Willy Sansen
1:30 - 3:00 pm	Distortion in Elementary Transistor Circuits	Willy Sansen
3:30 - 5:00 pm	Low-Power Continuous-Time Filters	Willy Sansen

THURSDAY, July 3

8:30 - 12:00 am	Ultra-Low Voltage Analog Circuit Design	Christian Enz
1:30 - 5:00 pm	Micropower ADCs	Kofi Makinwa

FRIDAY, July 4

8:30 - 12:00 am	Matching of MOS Transistors in Deep-Submicron	Marcel Pelgrom
1:30 - 3:00 pm	Layout Considerations in Mixed-Signal Circuit Design	Marcel Pelgrom
